

CIV RANGE

The CIV range of in-line centrifugal fan unit is available in 6 standard sizes by using different case / impeller combinations.

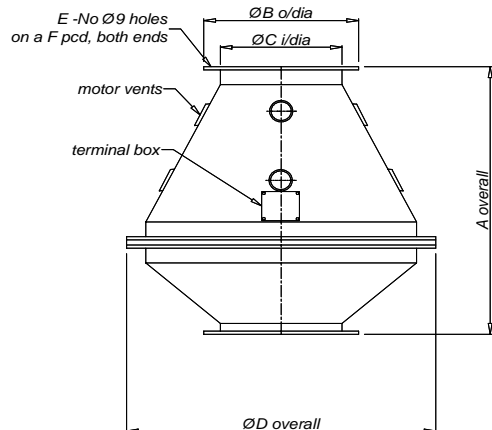

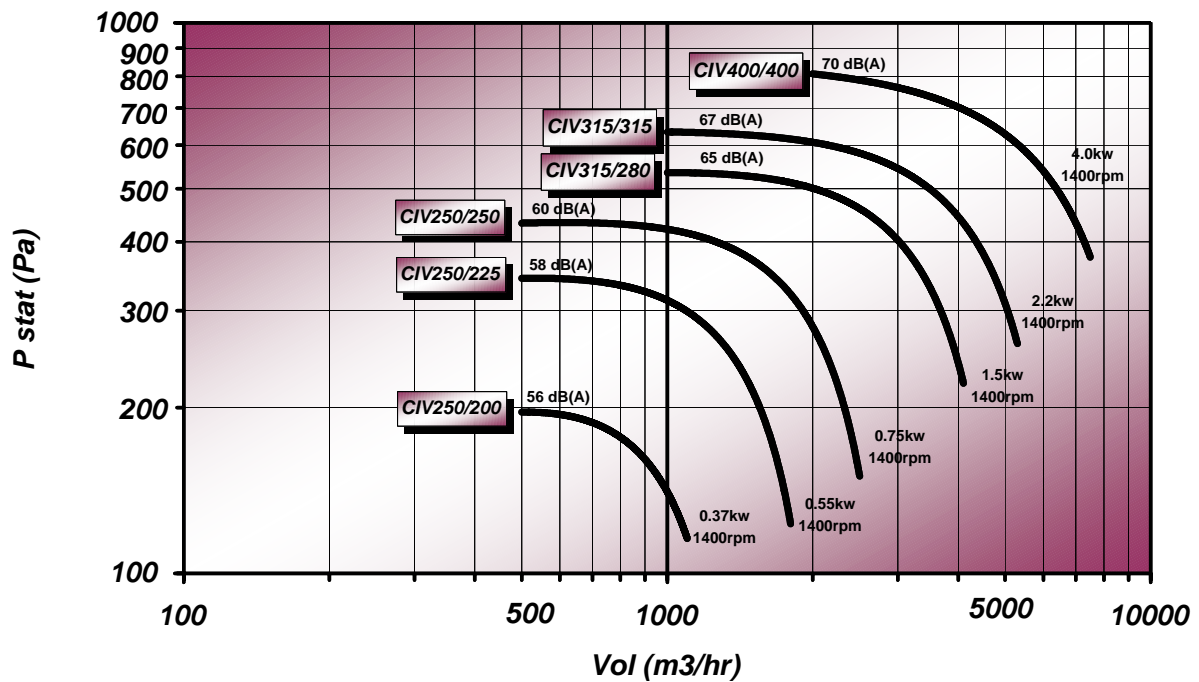

These units have been designed to operate in very confined areas such as those above fume cupboards.

All units are fitted with the CMV forward curved impeller directly driven by a TEFC IP55 motor as standard which is mounted out of the airstream inside a ventilated chamber, an external terminal box is provided for ease of installation.

These units are available in Polypropylene as standard with other materials are also available upon request.

Please note that these fan units are not suitable for zoned areas.
